

# Conservation and improvement of native livestock breeds in Portugal

*Luis T. Gama*

*INRB and FMV-UTL*

# Portugal

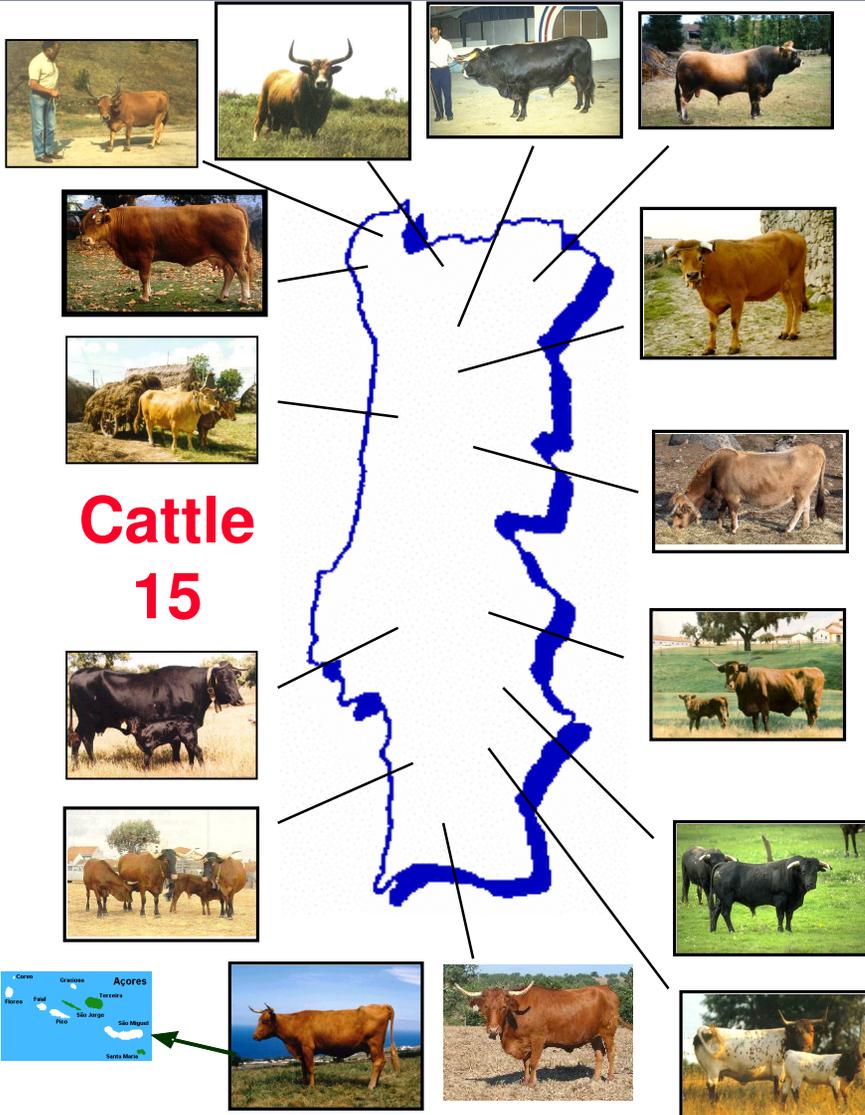

- Small surface
  - ◆ Heterogeneity of climate, orography, farm structure, etc.
  - ◆ High levels of diversity in AnGR

# Native breeds

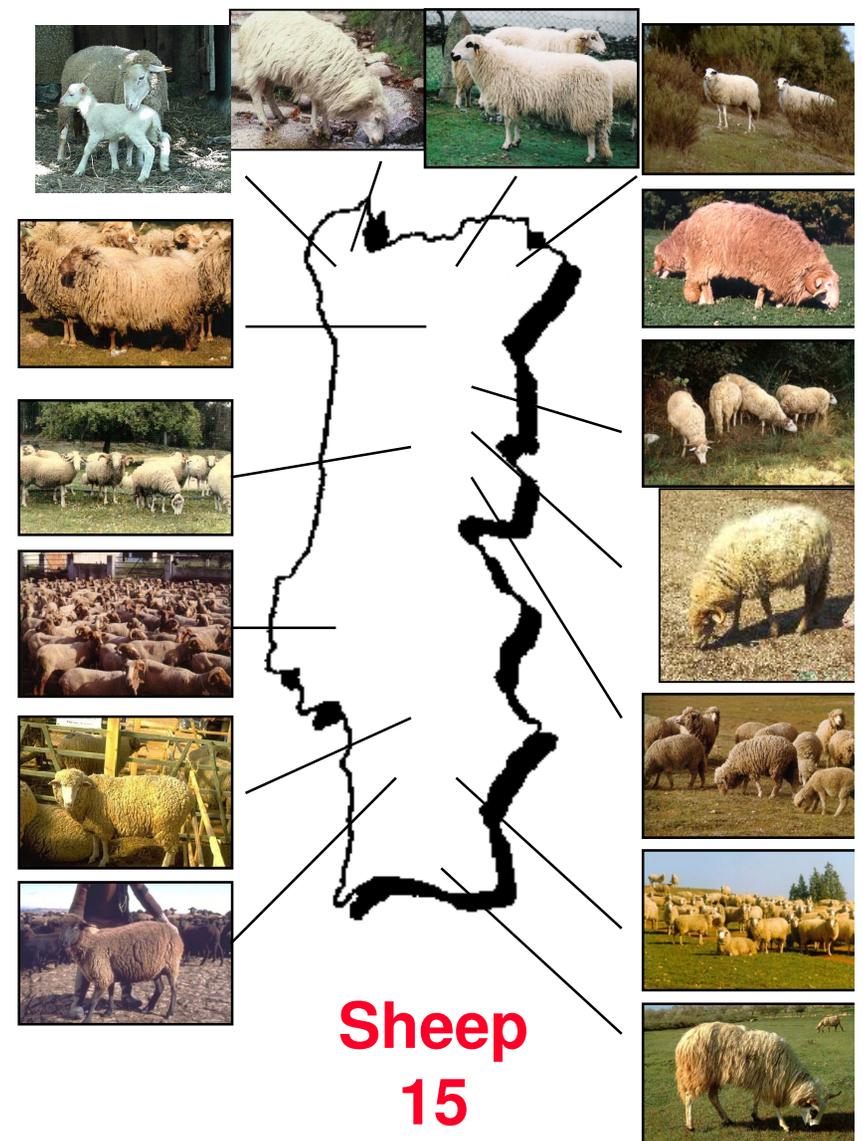

**Cattle**  
**15**

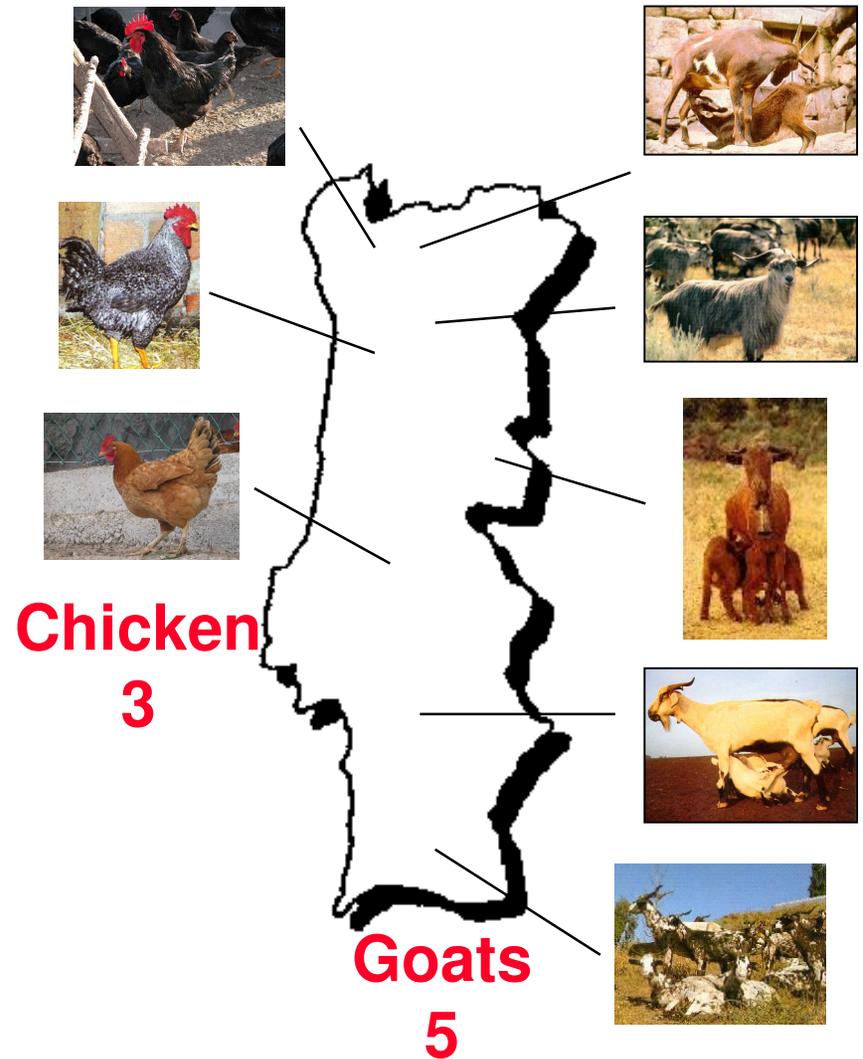

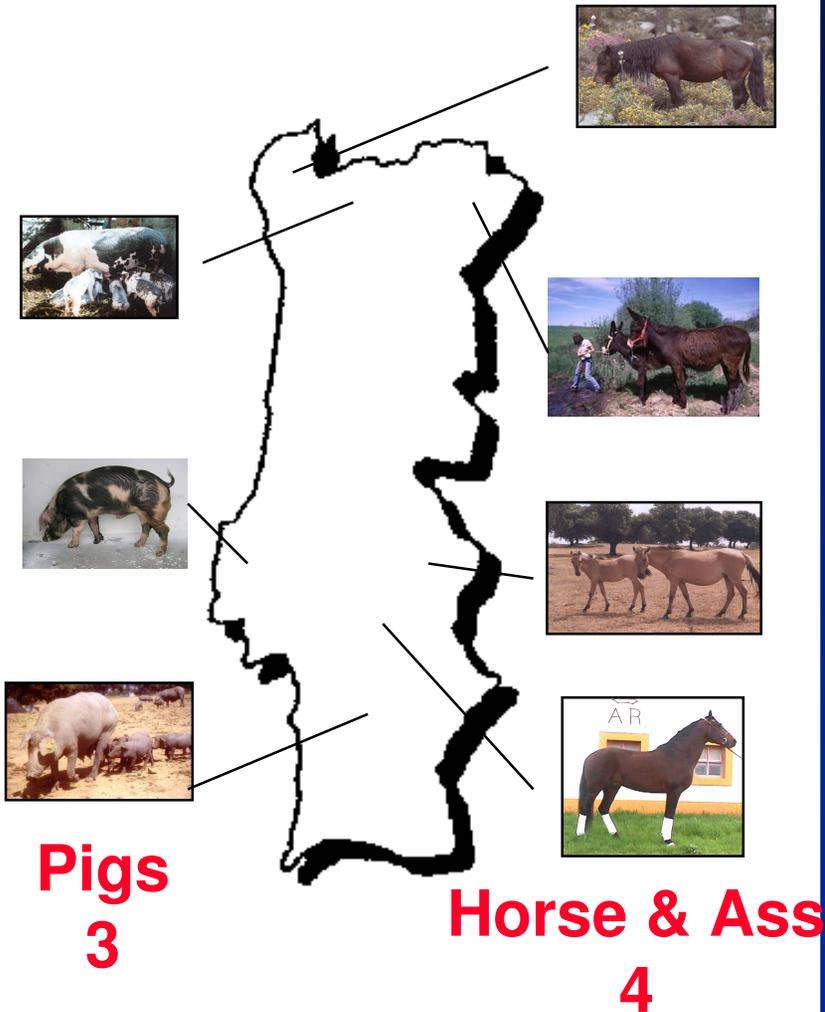

The inset map shows the Azores archipelago with islands labeled: Corvo, Flores, Faial, Pico, São Miguel, São Jorge, Terceira, Graciosa, and Açores. An arrow points to São Miguel.

**Sheep**  
**15**

# Native breeds

# Native breeds

- Overall
  - ◆ 45 native breeds
  - ◆ 38 in risk of extinction!
    - ☞ EU criteria
- Need for:
  - ◆ Characterization
  - ◆ Conservation
  - ◆ Sustainable utilization
    - ☞ Selection → ↑competitiveness

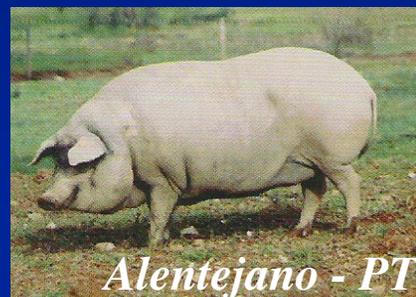

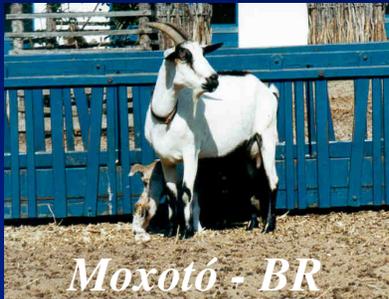

# Portugal

- Historical links with different regions of the world
  - ◆ Possible influence on AnGR

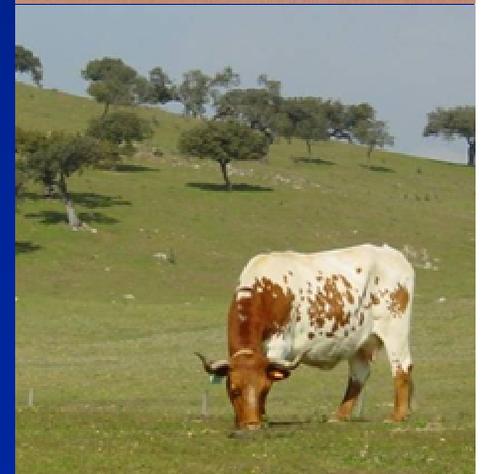

# Similarity of breeds

Portugal, Spain and Latin America

# National policy

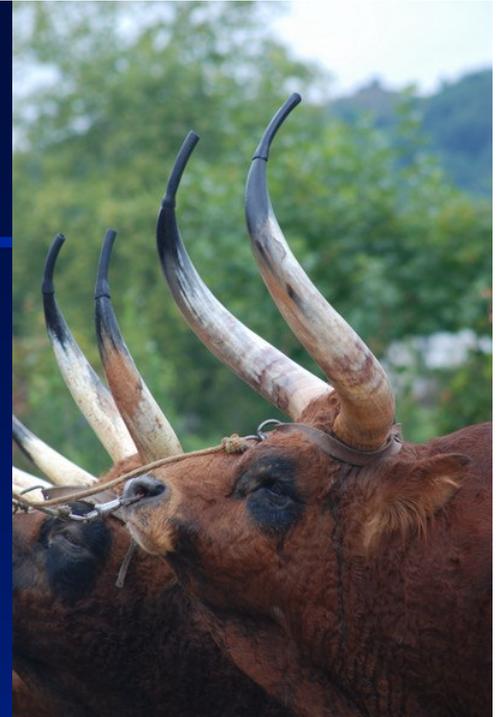

- Over the last few years, emphasis on:
  - ◆ Characterization of local AnGr
  - ◆ Valorization of products
  - ◆ Conservation programs
    - ☞ Ex situ
    - ☞ In situ
  - ◆ Selection programs

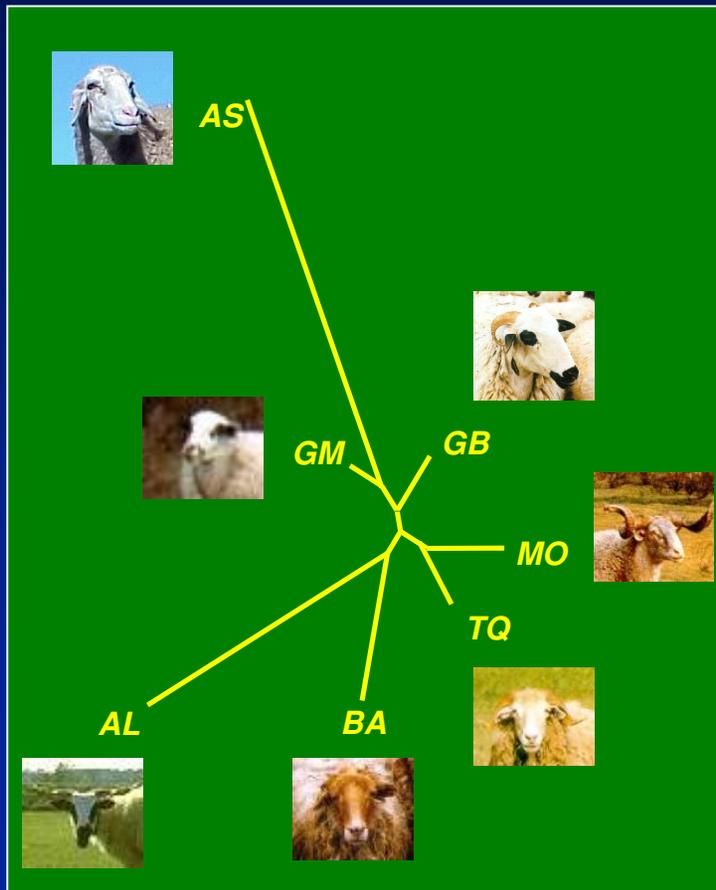

# Characterization

---

- Genetic
- Demographic
- Productive

# Sheep – Churra breeds

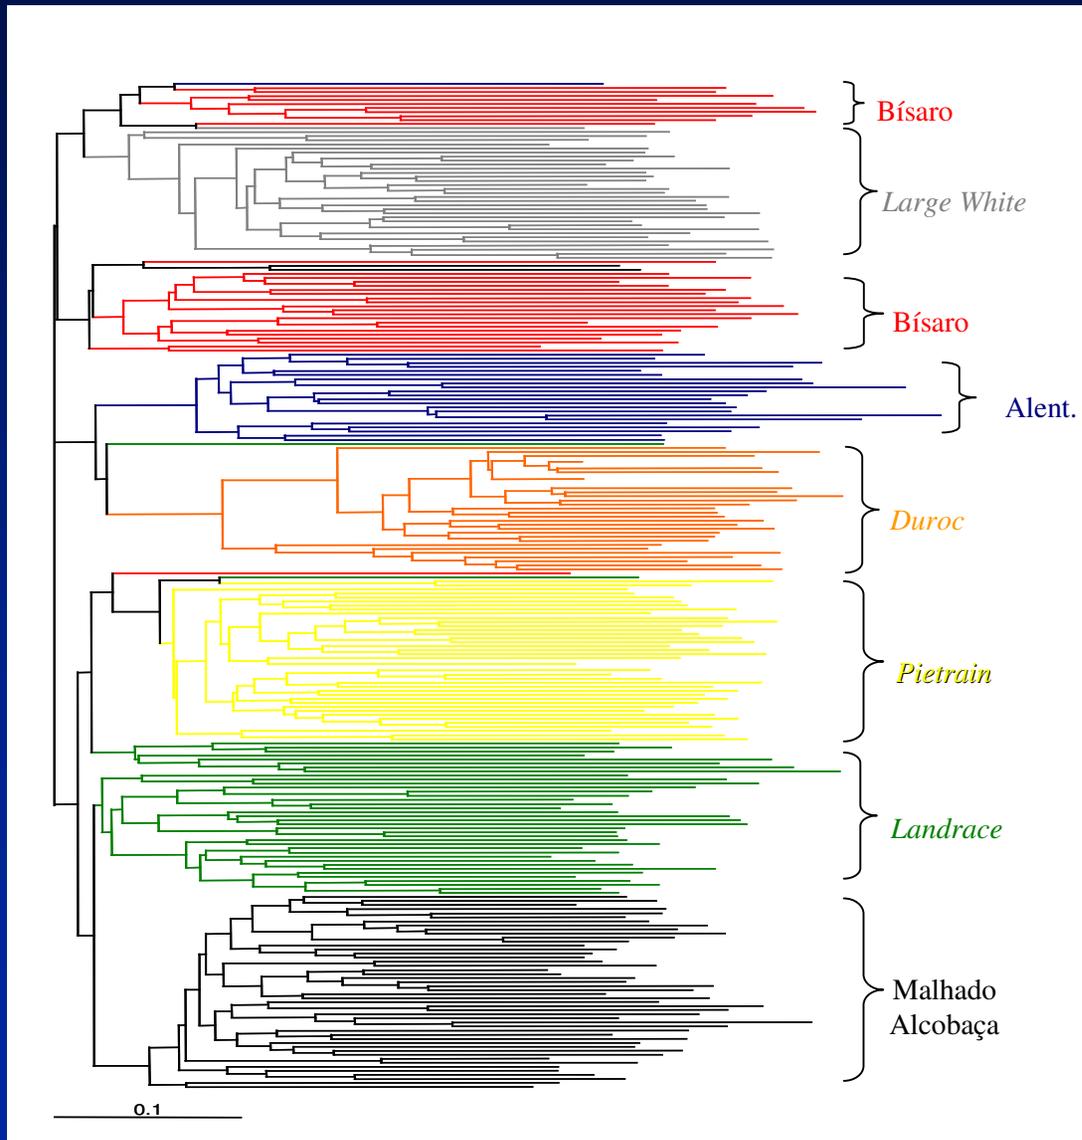

7 breeds  
22 microsats

*Santos-Silva et al., 2008*

# Characterization – pig breeds

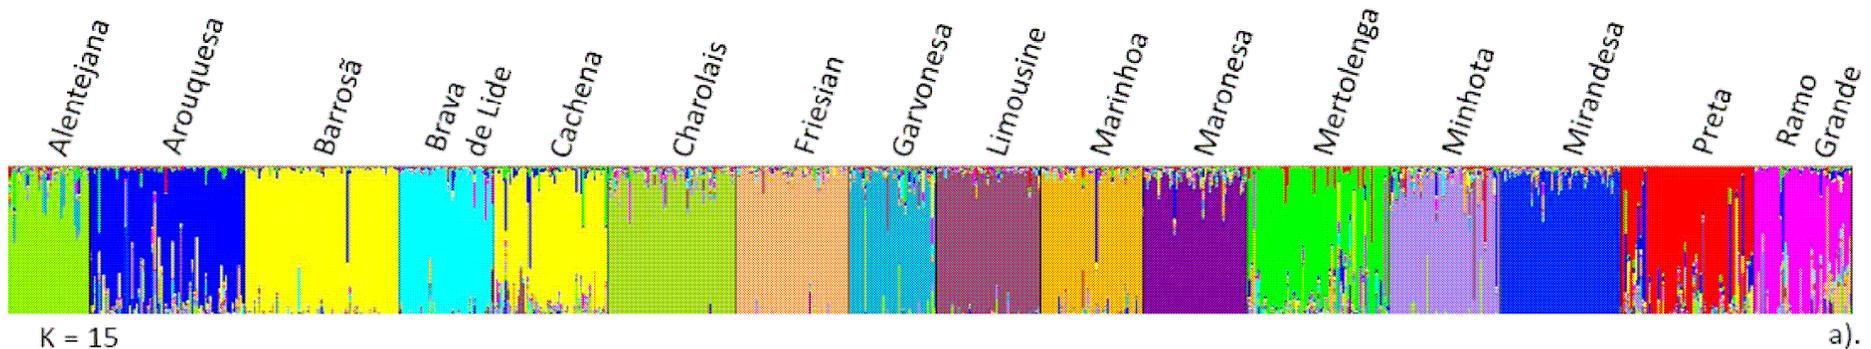

*Tree of  
individuals*

7 breeds  
22 microsats

*Vicente et al.,  
2008*

# Cattle: Portuguese breeds

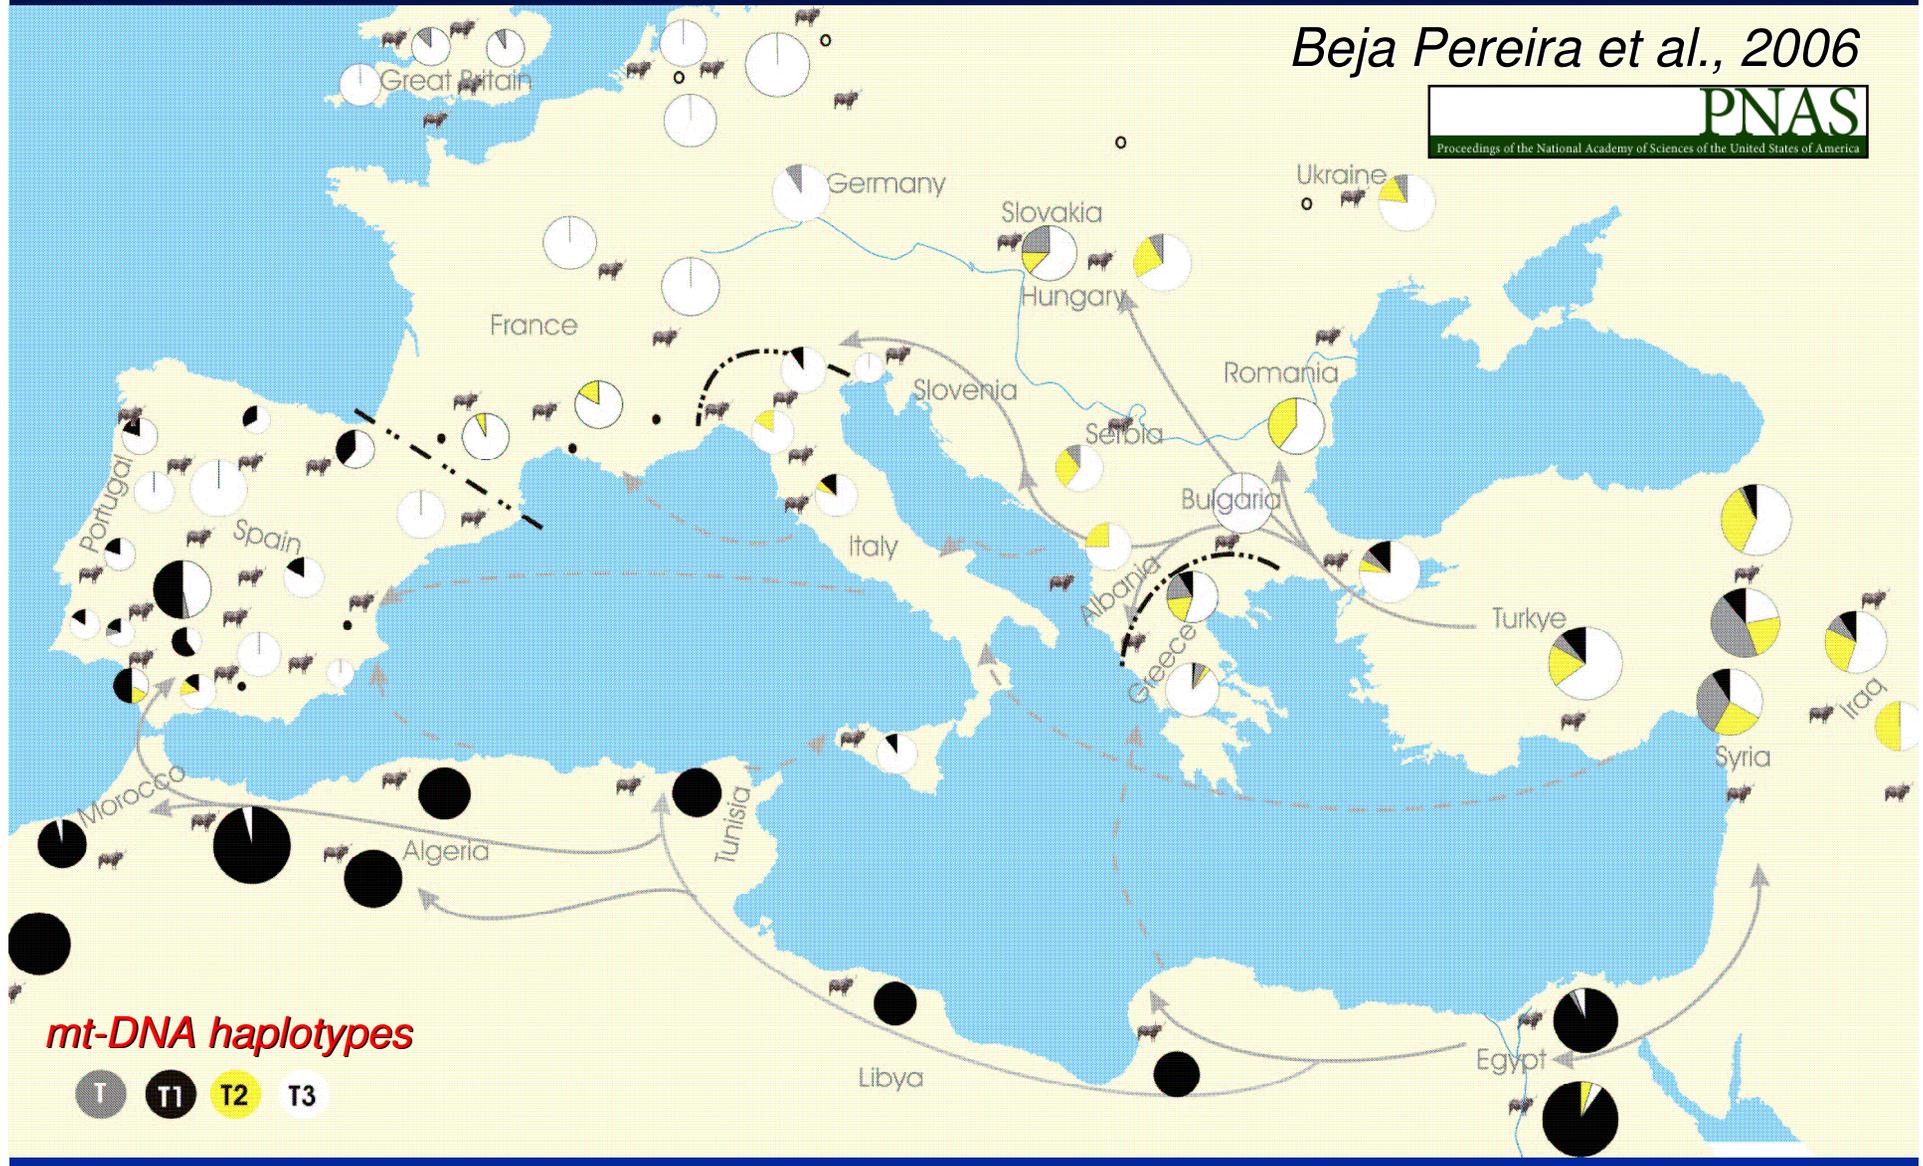

16 breeds  
38 microsats

*Ginja et al., 2009*  
*Submitted to An. Gen.*

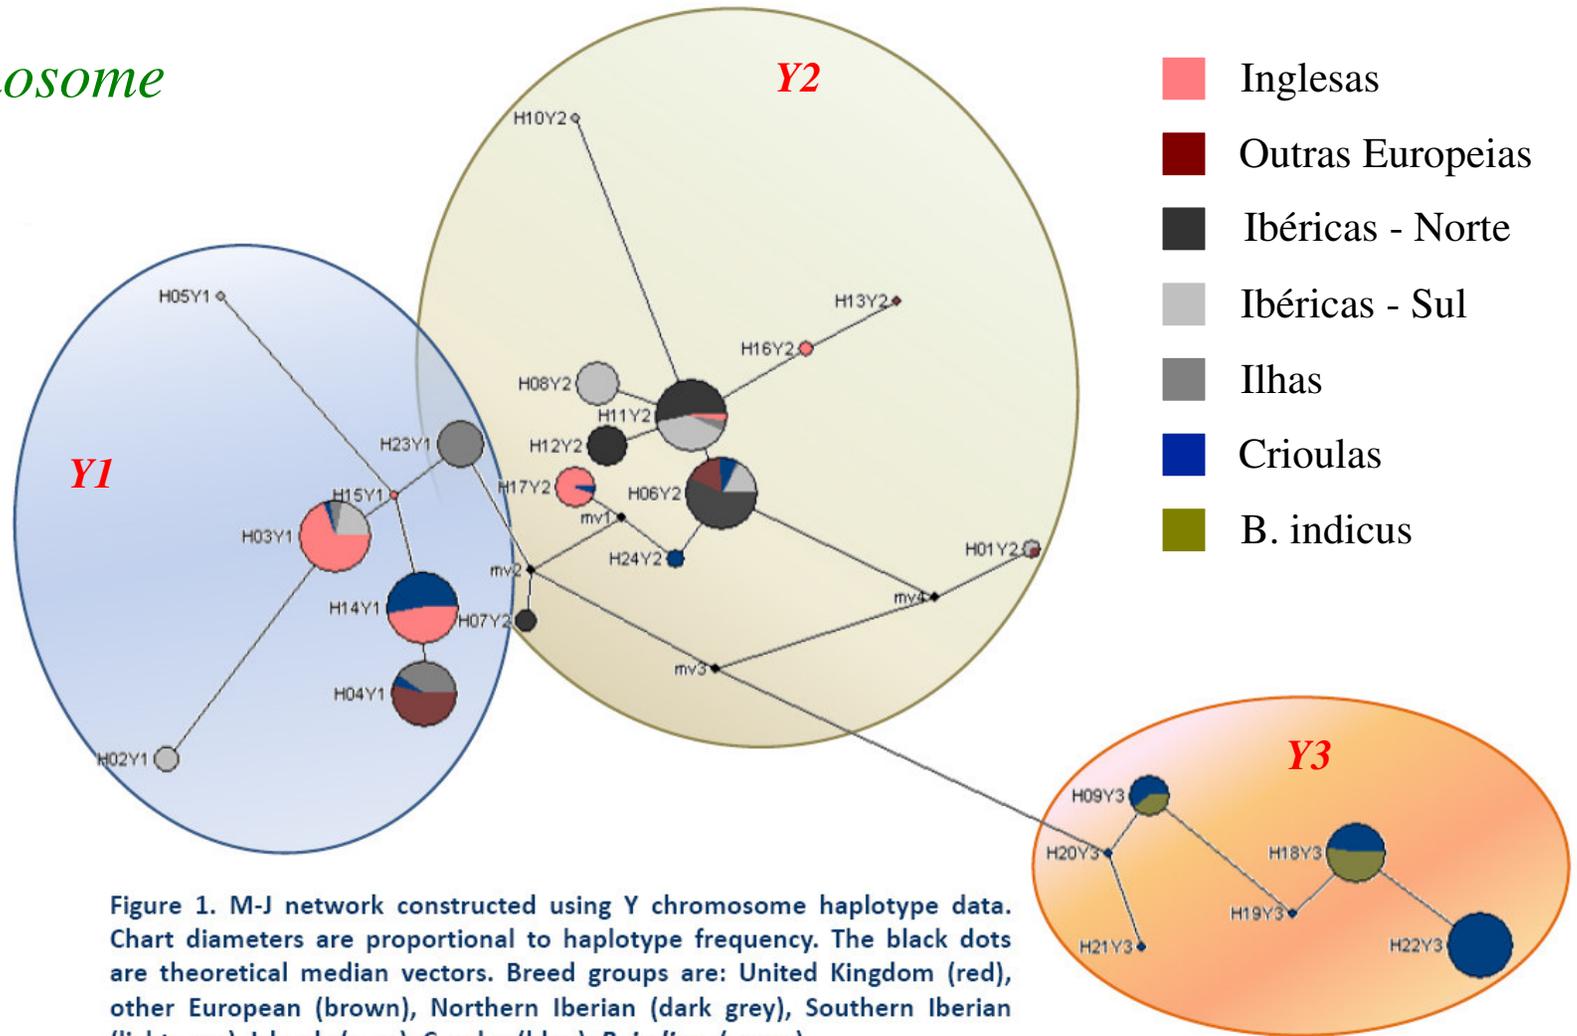

# mt-DNA: Mediterranean cattle breeds

Beja Pereira et al., 2006

# Cattle - Ibero-american breeds

*Y chromosome*

Ginja et al., 2008

Figure 1. M-J network constructed using Y chromosome haplotype data. Chart diameters are proportional to haplotype frequency. The black dots are theoretical median vectors. Breed groups are: United Kingdom (red), other European (brown), Northern Iberian (dark grey), Southern Iberian (light grey), Islands (grey), Creoles (blue), *B. indicus* (green).

# Demographic characterization - Example

**Malhado de Alcobaça**

200 Fêmeas; 1 Criador

**Mertolenga**

21000 Fêmeas; 250 Criadores

**Lusitano**

4000 Fêmeas; 300 Criadores

**Brava de Lide**

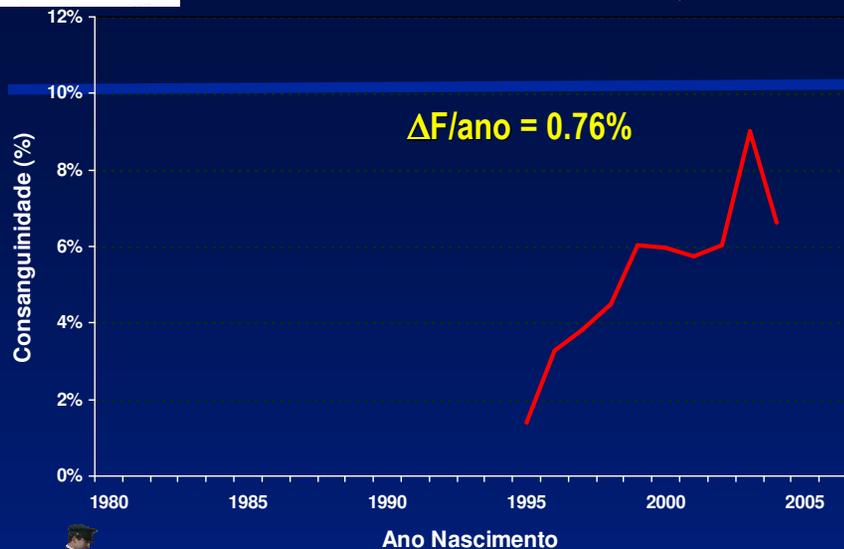

9000 Fêmeas; 93 Criadores

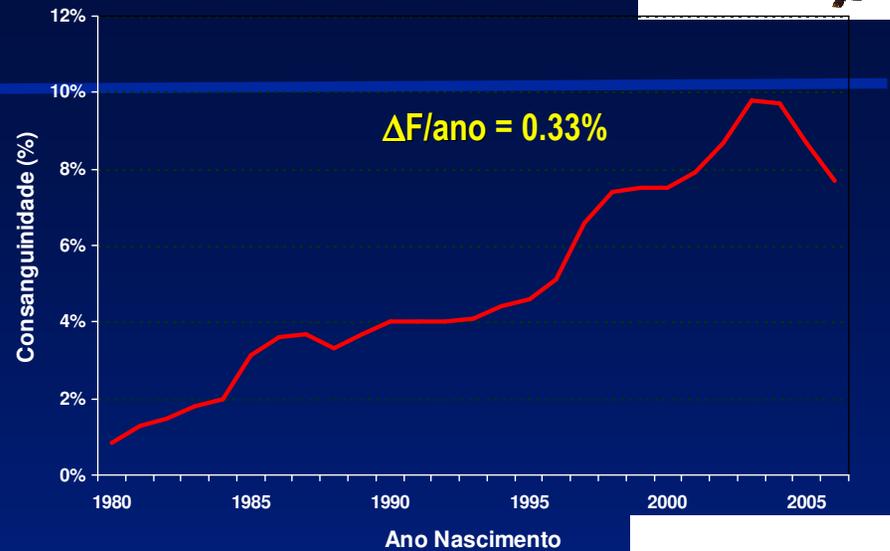

# Evolução da Consanguinidade

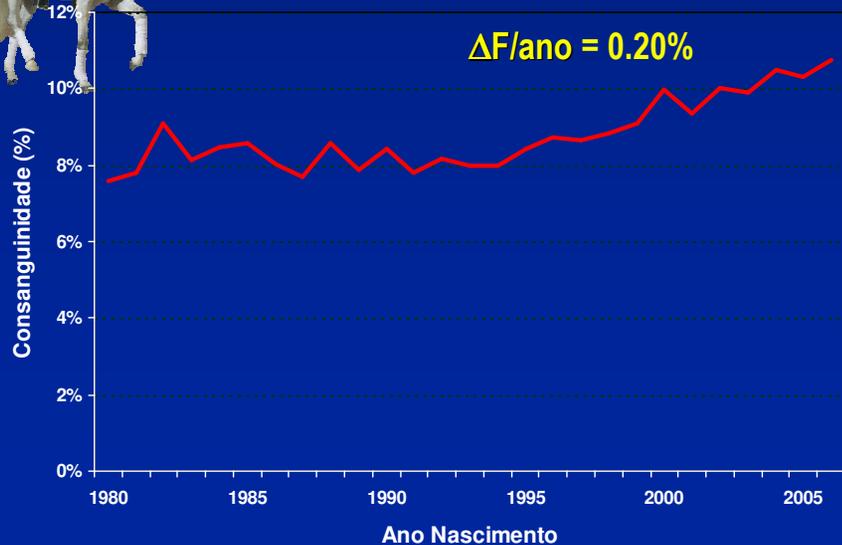

## Malhado de Alcobaça

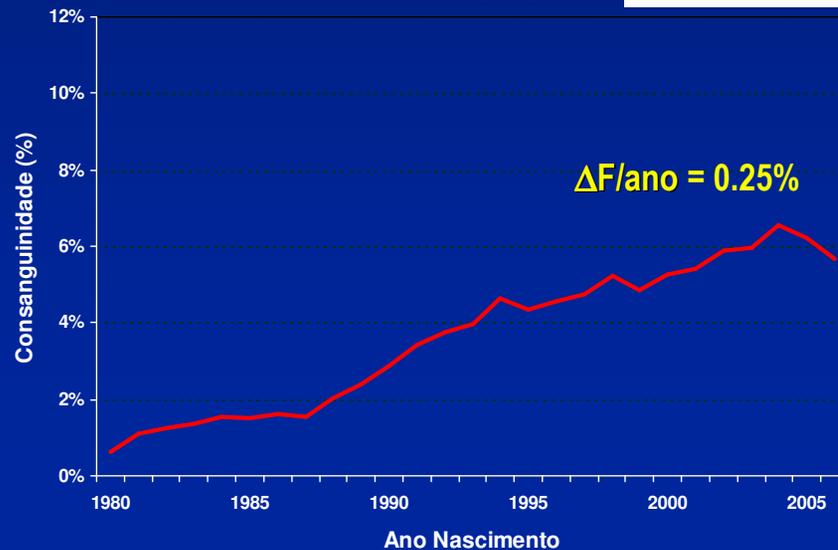

## Mertolenga

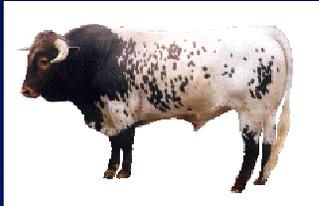

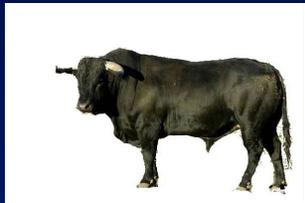

## Lusitano

## Brava

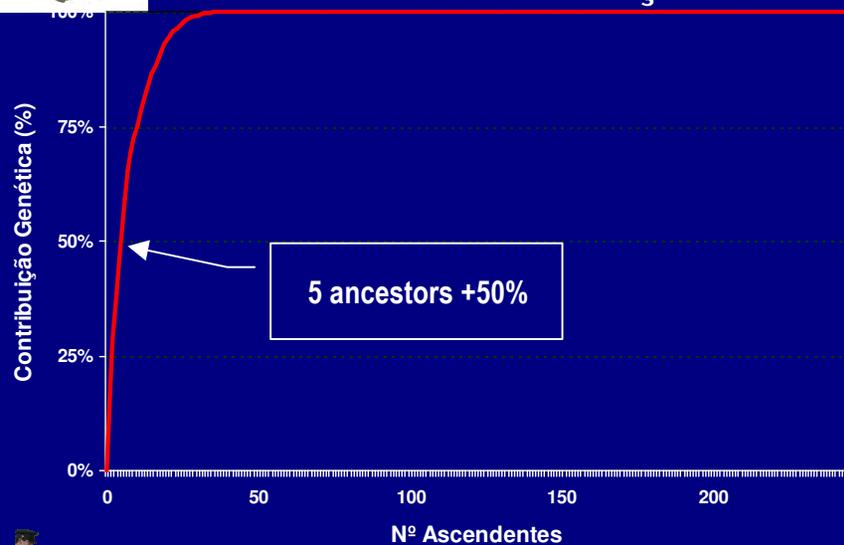

# Demographic characterization

				
	<b>Malhado de Alcobaça</b>	<b>Mertolenga</b>	<b>Lusitano</b>	<b>Brava</b>
<b>Nº ♀</b>	<b>200</b>	<b>21000</b>	<b>4000</b>	<b>9000</b>
<b>ΔF/ano</b>	<b>0.76%</b>	<b>0.33%</b>	<b>0.20%</b>	<b>0.25%</b>
<b>L</b>	<b>2.62</b>	<b>6.00</b>	<b>10.40</b>	<b>8.60</b>
<b>ΔF/gera.</b>	<b>1.99%</b>	<b>2.00%</b>	<b>2.08%</b>	<b>2.15%</b>
<b>N<sub>e</sub></b>	<b>25.1</b>	<b>25.0</b>	<b>24.5</b>	<b>23.3</b>
<b>f<sub>a</sub></b>	<b>12.7</b>	<b>80.3</b>	<b>13.8</b>	<b>211.9</b>
<b>f<sub>e</sub></b>	<b>13.1</b>	<b>125.0</b>	<b>37.5</b>	<b>262.3</b>

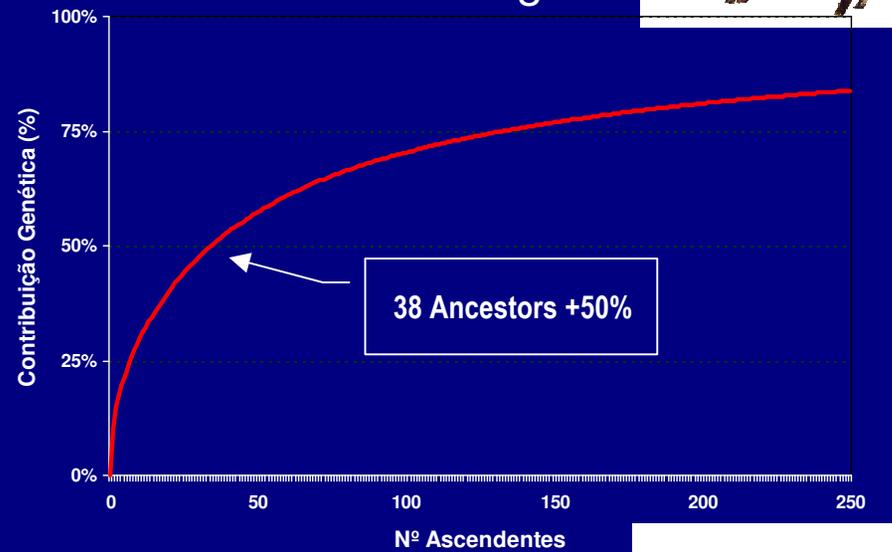

# Genetic contribution of ancestors

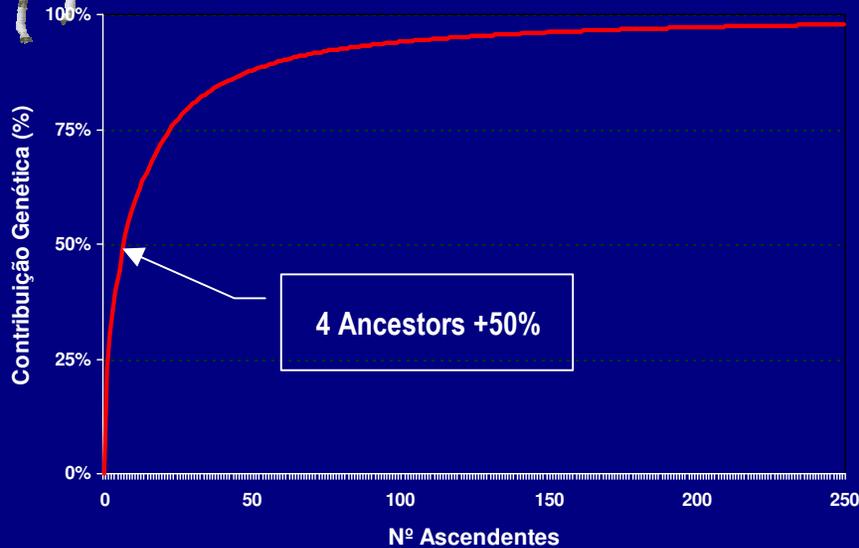

## Malhado de Alcobaça

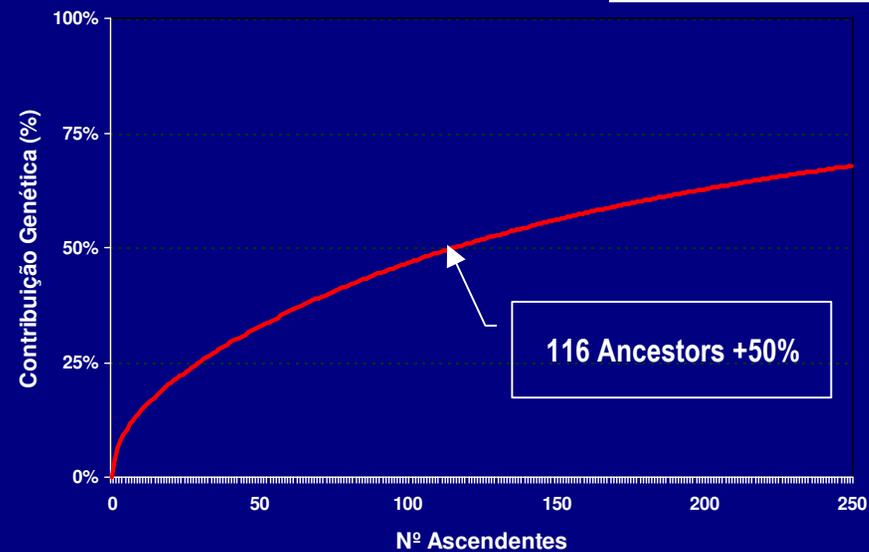

## Mertolenga

## Lusitano

## Brava

# Demographic analyses

---

- Need for:
  - ◆ Appropriate assessment criteria
  - ◆ Development of recommendations
- Probably different depending on:
  - ◆ Species
  - ◆ Genetic management

---

# **Valorization of products**

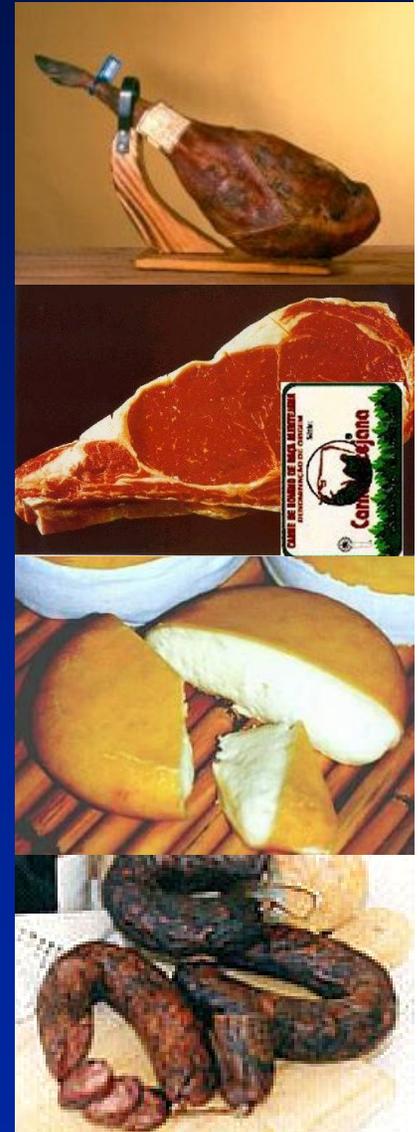

# Valorization of products

## ■ Certified products in Portugal

Type	n
Beef	10
Pork	2
Lamb	10
Kid	5
Cheese	13
Sausage	36

- Represent <5% of total consumption
- Price is ~20-50% higher than generic product

---

# Conservation of AnGR

# *Ex situ* conservation

- National Animal Germplasm Bank

	Semen		Embryos	
	No. breeds	No. sires	No. breeds	No. dams
Cattle	10	178	-	-
Sheep	10	59	3	32
Goats	5	36	3	7

# In situ conservation

- **Support to breeds in risk of abandonment**
  - ◆ EU regulations 1698/2005 and 1974/2006

<b>Status</b>	<b>Maximum number</b>					<b>Support €/std head</b>
	<b>Cattle</b>	<b>Sheep Goats</b>	<b>Pigs</b>	<b>Horse</b>	<b>Chicken</b>	
<b>Rare</b>	500	3 000	1 000	500	2 000	<b>200</b>
<b>Highly threatened</b>	2 500	5 000	5 000	2 000	10 000	<b>170</b>
<b>Threatened</b>	6 000	8 000	12 000	4 000	20 000	<b>110</b>
<b>At risk</b>	7 500	10 000	15 000	5 000	25 000	<b>90</b>

# How many breeds qualify for support?

- **Support to breeds in risk of abandonment**
  - ◆ EU regulations 1698/2005 and 1974/2006

<b>Status</b>	<b>No. breeds covered</b>					<b>No. breeds</b>
	<b>Cattle</b>	<b>Sheep Goats</b>	<b>Pigs</b>	<b>Horse</b>	<b>Chicken</b>	
<b>Rare</b>	3	3	1	1	3	<b>11</b>
<b>Highly threatened</b>	3	4	1	2	-	<b>10</b>
<b>Threatened</b>	4	6	1	1	-	<b>12</b>
<b>At risk</b>	2	3	-	-	-	<b>5</b>
<b>Total supported</b>	12	16	3	4	3	<b>38</b>
<b>Total no. breeds</b>	15	20	3	4	3	<b>45</b>

# In addition...

---

- Conservation herds/flocks kept in state farms for some of the highly endangered breeds

Garvonesa

Sorraia

Churra do  
Campo

Churra  
Algarvia

---

# **Breeding programs**

# Breeding programs - Objective

---

- ◆ To increase competitiveness of local breeds
  - ☞ Selection for production traits
  - ☞ Maintenance of genetic diversity
- ◆ Programs managed by breed associations
  - ☞ Plans approved in 2008
  - ☞ Scientific support by researchers
- ◆ Final goal (2010)
  - ☞ Conservation program underway
  - ☞ Genetic evaluation

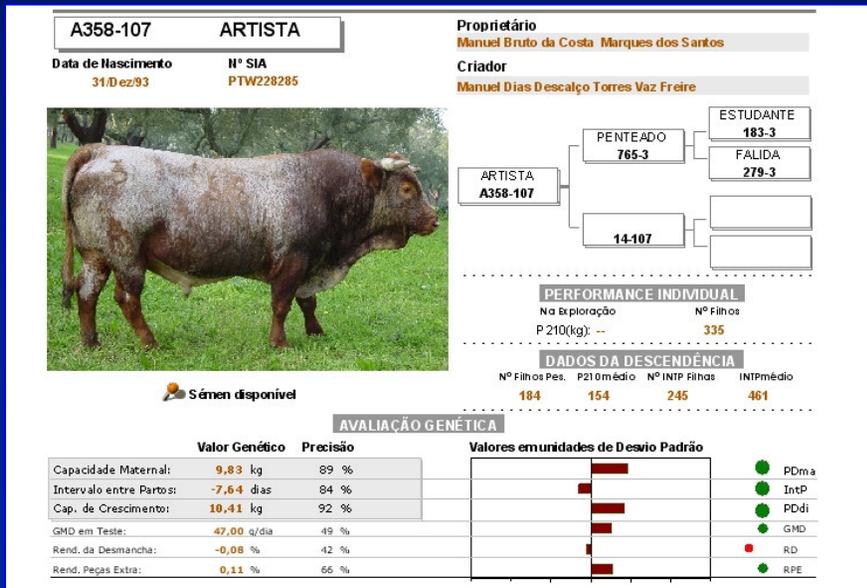

# Support to native AnGR

- Support to Breed Associations (cattle)

	Support (€)	Per
Registration in Herdbook	9	Animal
Parentage testing	18.5	Animal
Genetic characterization	20	Animal
Demographic characterization	3500	Breed
Ex situ conservation	800	Year
Artificial insemination	3000	Year
Carcass and meat quality traits	800	Year
Performance recording	12	Animal
Breed promotion	3250	Year
Genetic evaluation	3500	Year
Milk recording (sheep)	12	Animal

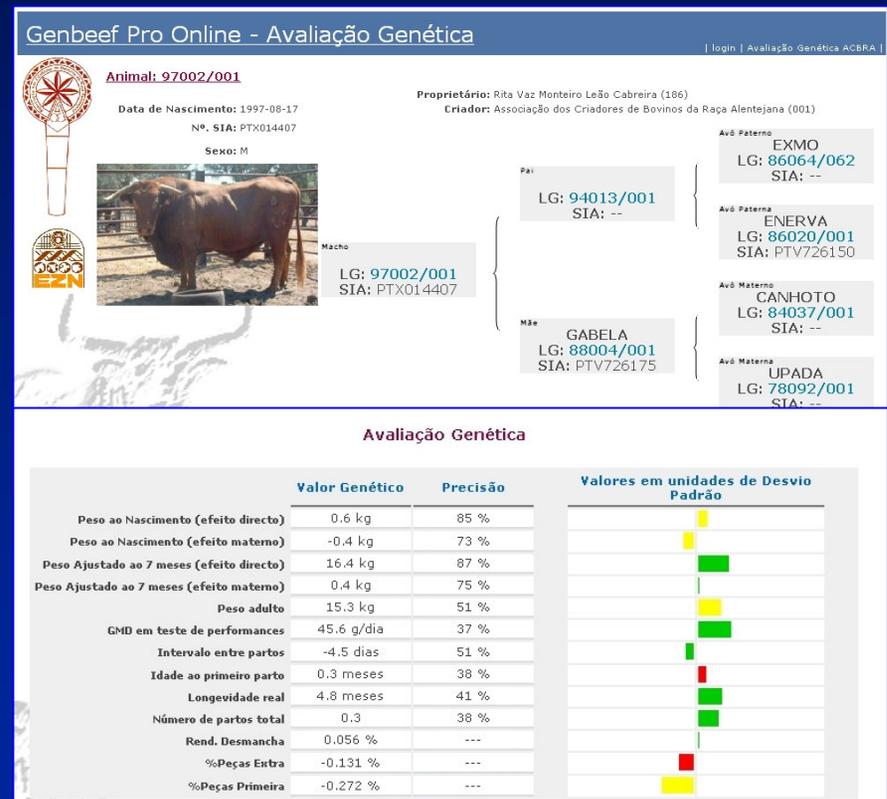

# Examples

## Mertolenga

6 traits  
 125729 records  
 122 bulls

## Alentejana

13 traits  
 100562 records  
 192 bulls

# Conclusion

---

- Breed associations are at a turning point
- Either:
  - ◆ set up conservation program
  - ◆ establish selection program yielding a genetic evaluation
  - ◆ or else...
